Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 11 February 2004.
- 2a) ☐ This action is FINAL. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION***Response to Amendment***

The following Office Action contains rejections to previously allowed and/or previously objected-to-as-allowable material as indicated in Office Action mailed 11/28/03. Accordingly, the following action has been made Non-Final.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 19,25 are rejected under 35 U.S.C. 102(e) as being anticipated by Jennetti et al. (6177883). The recitation "a corpectomy device" has not been given patentable weight because the recitation occurs in the preamble. A preamble is generally not accorded any patentable weight where it merely recites the purpose of a process *or the intended use of a structure*, and where the body of the claim does not depend on the preamble for completeness but, *instead*, the process steps or *structural limitations are able to stand alone*. See *In re Hirao*, 535 F.2d 67, 190 USPQ 15 (CCPA 1976) and *Kropa v. Robie*, 187 F.2d 150, 152, 88 USPQ 478, 481 (CCPA 1951). Fig. 3 shows a telescoping device having an inner tubular member 68 that is slidably and telescopingly received in an outer member 66. It can also be seen there is a locking clip 72 engageable with the outer member and has an aperture including

Art Unit: 3738

indentations and protrusions in the form of threads to correspond to the protrusions or threads **74** on the outer surface of the inner member.

Claim Rejections - 35 USC § 103

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claim 20 is rejected under 35 U.S.C. 103(a) as being unpatentable over Jennetti et al. '883 in view of Matsumoto '343. Jennetti et al. is explained supra. However, Jennetti does not disclose the locking clip with two inner surface portions being curvilinear and having different radii of curvature. Matsumoto teaches (Fig. 3A) a locking clip with inner surfaces having different radii of curvature. It would have been obvious to one of ordinary skill in the art to use an alternative locking clip as taught by Matsumoto with the telescoping device of Jennetti such that it can move in and out of rotation to engage the threads and more easily lock the implant, see col. 1, lines 40,41 of Matsumoto.

Response to Arguments

Applicant's arguments with respect to claims 20,25 have been considered but are moot in view of the new ground(s) of rejection.

Allowable Subject Matter

Claims 2-7,9-15,18,26-33,41 are allowed.

Claims 21-24 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
